

INDEX TO VOLUME XXXVI

- Adamek, Jirí and Merzenich, Wolfgang *Fixed points as equations and solutions*, 495–519
- Allegretto, Walter *Nonnegative solutions for weakly nonlinear elliptic equations*, 71–83
- Assem, Ibrahim *Torsion theories induced by tilting modules*, 899–913
- Banaschewski, B. *More on compact Hausdorff spaces and finitary duality*, 1113–1118
- Bárány, Imre, Füredi, Zoltán and Pach, János *Discrete convex functions and proof of the six circle conjecture of Fejes Toth*, 569–576
- Barnes, David C. *Supplements of Holder's inequality*, 405–420
- Bion-Nadal, Jocelyne *Espace des états normaux d'un facteur de type III_λ, $0 < \lambda < 1$ et d'un facteur de type III₀*, 830–882
- Bisztriczky, Tibor *Inflectional convex space curves*, 537–549
- Boivin, A. and Gauthier, P. M. *Approximation harmonique sur les surfaces de Riemann*, 1–8
- Borwein, J. M. and Richmond, B. *How many matrices have roots?* 286–299
- Borwein, J. M. and Strömberg, H. M. *Directionally Lipschitzian mappings on Baire spaces*, 95–130
- Brook, Cecilia H. *Decompositions of submeasures*, 577–590
- Bruce, J. W. and Gibson, C. G. *Distance-genericity for real algebraic hypersurfaces*, 374–384
- Bures, Donald *Modularity in the lattice of projections of von Neumann algebra*, 1021–1030
- Cain, Bryan E. *Some spectral properties of polar decompositions*, 973–985
- Djoković, Dragomir Ž. and Malzan, Jerry *Products of reflections in the group $SO^*(2n)$* , 300–326
- Dunkl, Charles F. *Orthogonal polynomials with symmetry of order three*, 685–717
- Edge, W. L. *Tangent spaces of a normal surface with hyperelliptic sections*, 131–143
- Fenn, Roger and Sjerpe, Denis *Basic commutators and minimal Massey products*, 1119–1146
- Fillmore, P. A. and Longstaff, W. E. *On isomorphisms of lattices of closed subspaces*, 820–829
- Forelli, Frank *A note on divisibility in $H^\infty(X)$* , 458–469
- Füredi, Zoltán, Bárány, Imre and Pach, János *Discrete convex functions and proof of the six circle conjecture of Fejes Toth*, 569–576
- Gauthier, P. M. and Boivin, A. *Approximation harmonique sur les surfaces de Riemann*, 1–8
- Geller, Daryl *Spherical harmonics, the Weyl transform and the Fourier transform on the Heisenberg group*, 615–684
- Gervais, Jean-Jacques *Deformations G-verselles et G-stables*, 9–21
- Giambruno, A. *On the symmetric hypercenter of a ring*, 421–435
- Gibson, C. G. and Bruce, J. W. *Distance-genericity for real algebraic hypersurfaces*, 374–384
- Graves, William H. and Ruess, Wolfgang *Compactness and weak compactness in spaces of compact-range vector measures*, 1000–1020
- Hahn, Kyong T. *Asymptotic behavior of normal mappings of several complex variables*, 718–746
- Higgs, Denis *Injectivity in the topos of complete Heyting algebra valued sets*, 550–568
- Hilton, Peter *On special group-automorphisms and their composition*, 591–600
- Hoo, C. S. and Murty, P. V. Ramana *Modular and admissible semilattices*, 795–799
- Hughes, Rhonda J. *On unbounded Volterra operators*, 914–923
- Iroz, Juana and Rush, David E. *Associated prime ideals in non-Noetherian rings*, 344–350

- Jespers, E. and Wauters P. *On central Ω -krull rings and their class groups*, 206-239
- Jha, Vikram *On translation planes which admit solvable autotopism groups having a large slope orbit*, 769-782
- Jouak, Mohamed and Thibault, Lionel *Equicontinuity of families of convex and concave-convex operators*, 883-898
- Knüppel, Frieder *A class of homomorphisms of pre-Hjelmslev groups*, 470-494
- Kobayashi, Shoji *Range sets and BMO norms of analytic functions*, 747-755
- Kohli, J. K. *A unified view of (complete) regularity and certain variants of (complete) regularity*, 783-794
- Koubek, Václav *Towards minimal binding varieties of lattices*, 263-285
- Kyuri, Soumaya Makdissi *Endomorphism rings and Gabriel topologies*, 193-205
- Laczkovich, M. *On the difference property of the class of pointwise discontinuous functions and of some related classes*, 756-768
- Lemaire, Claude *Localisation relative associée à une théorie de torsion*, 986-999
- Longstaff, W. E. and Fillmore, P. A. *On isomorphisms of lattices of closed subspaces*, 820-829
- Lowen-Colebunders, Eva *On the regularity of the Kowalsky completion*, 58-70
- Malzan, Jerry and Djoković, Dragomir Ž. *Products of reflections in the group $SO^*(2n)$* , 300-326
- Marcus, Daniel A. *Normal semimodules: A theory of generalized convex cones*, 156-177
- McAuley, Louis F. and Robinson, Eric E. *Discrete open and closed mappings on generalized continua and Newman's property*, 1081-1112
- McClure, J. P. and Wong, R. *Generalized Mellin convolutions and their asymptotic expansions*, 924-960
- Meier, David and Rhemtulla, Akbar *On torsion-free groups of finite rank*, 1067-1080
- Merzenich, Wolfgang and Adamek, Jiri *Fixed points as equations and solutions*, 495-519
- Murty, P. V. Ramana and Hoo, C. S. *Modular and admissible semilattices*, 795-799
- Ogg, A. P. *Some special classes of Cartan matrices*, 800-819
- Ono, Akira *Interior estimates for elliptic partial differential equations in the $\mathcal{L}(q, \lambda)$ spaces of strong type*, 385-404
- Oudass, Mohamed *Rayon de régularité dans les algèbres infrasequentielles*, 84-94
- Pach, János, Bárány, Imre and Zoltán, Füredi *Discrete convex functions and proof of the six circle conjecture of Fejes Toth*, 569-576
- Peterson, Bruce and Yuster, Thomas *A generalization of an addition theorem for solvable groups*, 529-536
- Pierre, R. *On explicit decomposition for positive polynomials on $[-1, +1]$ with applications to extremal problems*, 1031-1045
- Pin, J. E. *Semigroupe des parties et relations de Green*, 327-343
- Rhemtulla, Akbar and Meier, David *On torsion-free groups of finite rank*, 1067-1080
- Richmond, B. and Borwein, J. M. *How many matrices have roots?* 286-299
- Robinson, Eric E. and McAuley, Louis F. *Discrete open and closed mappings on generalized continua and Newman's property*, 1081-1112
- Ruess, Wolfgang and Graves, William H. *Compactness and weak compactness in spaces of compact-range vector measures*, 1000-1020
- Rush, David E. and Iroz, Juana *Associated prime ideals in non-Noetherian rings*, 344-360
- Singh, Surjeet *Serial right Noetherian rings*, 22-37
- Sjerve, Denis and Fenn, Roger *Basic commutators and minimal Massey products*, 1119-1146
- Small, Charles *Diagonal equations over large finite fields*, 249-262

- Stout, Edgar Lee *Smooth boundary values along totally real submanifolds*, 240-248
- Strojas, H. M. and Borwein, J. M. *Directionally Lipschitzian mappings on Baire spaces*, 95-130
- Swardson, Mary Anne *The character of certain closed sets*, 38-57
- Thibault, Lionel and Jouak, Mohamed *Equicontinuity of families of convex and convex operators*, 883-898
- Tholen, Walter *Pre-categories and multiadjoint functors*, 144-155
- Tinsley, Fred and Wright, David G. *On vertical order of one-dimensional compacta in E^3* , 520-528
- Vanstone, J. R. *A canonical decomposition in mixed exterior algebra*, 361-373
- Varadarajan, K. *Projective approximations*, 178-192
- Vauthier, J. *Fonction de Green et surfaces nodales des fonctions propres de l'hamiltonien $-\frac{1}{2}\Delta + V$* , 601-614
- Wauters, P. and Jaspers, E. *On central Ω -krull rings and their class groups*, 206-239
- Winter, David J. *Outer derivations and classical-Albert-Zassenhaus Lie algebras*, 961-972
- Wolfgang, Merzenich and Adamek, Jiri *Fixed points as equations and solutions*, 495-519
- Wong, H. Ship-Fah *A general form of the functional LIL for Banach-valued Brownian motion*, 1046-1066
- Wong, R. and McClure, J. P. *Generalized Mellin convolutions and their asymptotic expansions*, 929-960
- Wright, David G. and Tinsley, Fred *On vertical order of one-dimensional compacta in E^3* , 520-528
- Wright, Steve *Weakly compact, operator-valued derivations of type I von Neumann algebras*, 436-457
- Yuster, Thomas and Peterson, Bruce *A generalization of an addition theorem for solvable groups*, 529-536
